

## Call for Volunteers: AIC Wiki's Imaging Section

The AIC Imaging Working Group (IWG) is seeking volunteers to act as **Team Leads**, **Wiki Editors**, and **Content Creators** to create and edit content on the [AIC Wiki's Imaging Section](#). This is a great opportunity for individuals who are passionate about imaging and want to contribute to the field and connect with others working with imaging.

**Team Leads** are currently needed for the RTI and X-Ray Topic Groups

**Wiki Editors** and **Content Creators** are welcome in the following Topic Groups:

- X-Radiography
- Visible Light Imaging
- RTI
- 3D Imaging
- False-color image processing
- Infrared Imaging
- UV Imaging

As a volunteer, you will have the chance to deepen your understanding of imaging through clear and descriptive writing, as well as to collaborate with fellow experts in the field. Volunteers will be responsible for creating and editing content on the Wiki's Imaging Section and ensuring that the information is accurate, up-to-date, and easily accessible.

The Imaging Section serves as a valuable resource for the conservation and heritage imaging community, providing a wealth of information on imaging techniques, equipment, and best practices. By volunteering as a Team Lead, Wiki Editor, or Content Creator you will be playing a critical role in sharing resources and building the IWG community.

If you are interested in becoming a volunteer for the AIC Wiki's Imaging Section, please reach out to the IWG Leadership team at [aic.imagingwg@gmail.com](mailto:aic.imagingwg@gmail.com). We look forward to hearing from you and working together to enhance the Wiki.
